

You will need:

- Terracotta planter (medium size)

Optional:

- Paint and paintbrush

Directions:

1. Making a home for our toad friends is a great way to use your broken planters! You can decorate it however you like or not. Just place in a garden area to create a shaded and damp area for your toads to enjoy.
2. You can also use a fully intact planter and just turn it on its side and bury the bottom 1/4 in a garden. Leave it plain or decorate!

Step 1

Step 2

Note: If decorating with paint, I recommend using an acrylic paint and then spraying with an acrylic sealer to keep the paint on longer in the weather!
